SUMMARY

Enthusiastic engineering student with hands-on experience in Artificial Intelligence, Deep Learning, and hardware projects. Completed a Summer Internship at Oracle (Generative AI), worked on a banking system project, and developed an Arduino-based Campsite Smart Assistant. Currently working on “Historical Cyber Intrusion Analysis: An Integrated Data Warehousing, OLAP, and Data Mining Framework,” with strong teamwork and problem-solving skills.

EDUCATION

VIT-AP University <i>Bachelor of Technology in Computer Science and Engineering</i>	Amaravati, India 2023 – 2027
Narayana Junior College <i>Class 12 (MPC)</i>	Vijayawada, India 2021 – 2023

EXPERIENCE

Generative AI Intern <i>Oracle</i>	Summer 2025 <i>Remote</i>
- Worked on Generative AI concepts including prompt engineering and LLM-based workflows. - Built and evaluated AI-driven solutions for text generation and automation tasks. - Collaborated with team members to experiment with model outputs and improve response quality. - Gained hands-on exposure to industry-level AI development practices and tools.	
AWS Cloud Architect Intern <i>Self-Driven / Academic Project</i>	2025 <i>Remote</i>
- Designed and deployed scalable cloud architectures using core AWS services such as EC2, S3, and IAM. - Implemented secure access control and storage solutions following AWS best practices. - Explored cloud monitoring and cost optimization techniques using CloudWatch. - Gained practical experience in cloud infrastructure design, deployment, and management.	

PROJECTS

Historical Cyber Intrusion Analysis Framework <i>Data Warehousing, OLAP, Data Mining</i>	2026 – Present
- Designing an integrated framework to analyze historical cyber attack data using data warehousing techniques. - Implemented OLAP operations for multi-dimensional analysis of intrusion patterns. - Applying data mining algorithms to detect trends and generate security insights. - Collaborating in a team environment to build scalable analytical workflows.	
Banking System Application <i>Java, OOP, SQL</i>	2025
- Developed a console-based banking management system implementing core OOP principles. - Implemented features such as account creation, deposit, withdrawal, and balance inquiry. - Ensured modular and maintainable code structure using Java best practices.	
Campsite Smart Assistant <i>Arduino, Embedded Systems</i>	2025
- Built an Arduino-based smart assistant to enhance campsite safety and automation. - Integrated sensors to monitor environmental conditions and trigger alerts. - Programmed microcontroller logic for real-time response and low-power operation. - Demonstrated practical hardware-software integration skills.	

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R
Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI
Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
Libraries: pandas, NumPy, Matplotlib
